

LANE RESTRICTIONS

Sepulveda Blvd between Vicksburg Ave Bridge & Sepulveda Tunnel Portions of 96th St, 98th St, Century Blvd and West & East Loops

Ongoing through Friday, March 14; Nightly from 10PM to 5AM

ACTIVITY

To facilitate underground utility investigations (potholing) for the Airfield and Terminal Modernization Project (ATMP), lane restrictions will be in place on Sepulveda Boulevard between the Vicksburg Avenue Bridge and the Sepulveda Tunnel through Friday, March 14, nightly from 10PM to 5AM. Through traffic will be maintained in both directions; up to three lanes may be restricted with at least one lane open at all times.

While the majority of potholing will take place on Sepulveda Boulevard, additional lane restrictions will be in place as needed on portions of 96th Street, 98th Street, Century Boulevard (including "Little Century" access road to LAX) and the West & East Century / Sepulveda Boulevard Loops to facilitate this work. Please note, "Little Century" will be maintained for Ride App and Park One access.

Detours will be in place to facilitate traffic movements; watch for posted signage and follow detour routes. Please use caution when traveling near construction areas and plan ahead for potential delays.
